FIG. 5

A bar graph showing the number of fusion events for two conditions: HEp-2 only and HEp-2 + 20uM Lovastatin. The y-axis is labeled 'Fusion Events' and ranges from 0 to 250 in increments of 50. The 'HEp-2 only' bar is approximately 215 units high, and the 'HEp-2 + 20uM Lovastatin' bar is approximately 80 units high. Both bars include error bars.

Condition	Fusion Events (approx.)
HEp-2 only	215
HEp-2 + 20uM Lovastatin	80
